

MAINTENANCE & TROUBLESHOOTING BELKIN RANGE EXTENDER

Maintenance And Troubleshooting Belkin Range Extender

Hello, World

those were days when the internet was a thing with Messy cables around the Home. Now With latest Wireless Routers, These Things Have become a Thing of Past but even this technology seems Uneffective in Some Cases.

When you a Big house or Even a Medium One With thin Walls Than Signal Strength & Quality of Wireless Quality Gets Broken. to Rectify this issue-You would need a Range Extender that helps to Boost the Signal Connectivity Throughout the Home.

a Lot of People Use Router + range extender for their Office

Also so when it comes to Range Boosters Belkin Range Extenders Are Among Favorite Choices. in this Post, we will Help You Understand How to Maintain the Belkin range extender for Maximum Performance.

Over the Period of time, We see the performance of range Extender Decreasing Significantly or maybe The users have Never Configured the Extender With Correct Settings in the first place.

Placement Of Belkin Extender –

After you have Configured Belkin extender it Really Important that You Place the Belkin Extender to your Home in a Way so that you Entire House Hold Can reap the Benefits of Range extender Without Any Trouble.

Typically a Router Does Cover 30-35 Feet of the area with Good Speed & connectivity But when you have the range extender it can Cover Up to 70-80 feet. So For you to Get the Best Performance out of Extender & cover More Field You Need to place the extender within 30 feet from the router.

Make Sure you Keep the Signal Antenna Pointed Towards the area Where you have Weak Signals.

Temperature Maintenance –

Keep the extender Placed at a Cool & Dry Place. If Possible

Please Restart the Belkin Range Extender Every Once in While to Keep it Cool & Prevents It From Overheating. You Can Do the Same for Main Router Also. in Our Experience Doing a Restart every 48 Hours Helps you Keep the Performance Study For a Longer Period of time.

Update the Firmware –

It's really Important that You Update the Latest Firmware to Enhance the security & performance of Belkin Range Extender & Your Base Router. Just Login to Belkin Extender using 192.168.206.1 to access the Belkin extender dashboard. Check for latest Updates & Install if there is a Newer Version of Update Available. A Firmware Update Can fix many security & Performance Issue So Let's Not Ignore them.
