

# Top 7 Security Suites That Are Worth the Money

Hello, World

Welcome to FixinGeek by this post you will know about top 7 security suites that are worth the money and these 7 securities will help you to protect your all devices from malware, viruses and so on.

Antivirus alone cannot protect your data and programs from malware attack. You need a fully integrated group for taking care of your security needs. In short, you need a security suite. After crossing Spectrum Internet availability from your list (because who doesn't want fast internet bundled in great deals), the next item on your list must be getting a security suite.

There is a variety of security companies offering security suites.

Some of them are just offering basic features, while others come with tons of extras. These security software can deduct issues in your PC, protect your data and stop malware infection.

To make the job easier for you, here are 7 best security suites on the market that are actually worth the money:

### **#1: Bitdefender Total Security Multi-Device 2019 –**

Bitdefender is on the top of the list when it comes to security suites and all for good reasons. It is extremely fast and accurate. It offers secure browsing, spam filter, and a password manager, battery management, file encryption, ransomware protection, WI-FI protection, etc.

Its recent version has a new dashboard and it features upgrades such as ransomware remediation and network threat prevention. Bitdefender is offering a 50% discount on the first payment. That means you can save money and protect up to 5 devices at half the price.

### **#2: Kaspersky Total Security 2019 –**

When we are talking about top security suites, how can we forget the name of Kaspersky? The company is offering a great protection package. The price of total security is \$79.95 for a single device per year. It is compatible with Android devices, iOS MAC, and PC. It has a solid security scanning ability. Other features include password management, privacy protection, child safety measures, parental controls, VPN, etc. Its free trial version is available for download as well.

### **#3: McAfee LiveSafe –**

It's available for \$109.99 per year and you can protect unlimited devices at this cost. McAfee LiveSafe is the cheapest option out there among security suites. Plus, it is user-friendly. It guarantees 100 percent virus removal or they will return your money. Features include anti-spam, parental controls, identity protection, password management, website scanning, etc. It supports Macs, phones, PCs, and tablets.

### **#4: Symantec Norton Security Premium –**

Symantec Norton Security Premium costs \$55 a year for new users and then \$110 if you continue using it. It can protect up to 10

devices which include Android, iOS, Mac, and PCs. It has excellent malware scanning. Other features include identity protection, parental controls, and warning against dodgy apps. It also offers 100 percent virus removal guarantee. However, you don't get optimization tools and a password manager.

#### **#5: Norton 360 Deluxe –**

Norton 360 Deluxe costs \$99.99 a year. But it's available on 40 percent discount for new users for the first year. The features it supports include password manager, dark web monitoring, secure VPN, real-time threat protection, Safecam, parental controls, 50 GB cloud backup.

Norton's antivirus products are great when it comes to malware protection. However, they have fewer security features than their competitors.

Norton 360 Deluxe offers advanced security and virus protection. It supports up to 5 devices (Macs, PCs, smartphones, and tablets).

For an extra \$50 a year, you can get LifeLock Select with Norton 360.

You will get more storage and LifeLock identity protection.

#### **#6: Avast Internet Security –**

Avast internet security is a highly effective antivirus tool. It comes with a standard security feature. You can even run harmful apps in a secure environment without worrying about security risks.

Its license costs \$59.99 a year and it supports 1 device only. You can also buy 2 years and 3 years subscription for \$109.99 and \$159.99 respectively. The features you will get include behavior shield, intelligent antivirus, cybercapture, smart scan, ransomware shield, password manager, and sandbox.

This anti-spam module also lets you block unsolicited spam messages. If you want a VPN, SecureLine is at your service. However, it is not free, you have to purchase an additional subscription for this service. A good thing is once you have bought the license, no extra setup is needed.

There are some downsides of Avast which is why it's #6 on our list. It does not include technical support or offers parental controls. If you need a less demanding security suite, only then it would be the right choice.

**#7: Panda Dome Advanced –**

Formerly known as Panda Global Protection, Panda Dome offers all the company's security tools in a single suite. The features you get depend on what package you choose whether it's Essential Package, Complete Package, Premium Package or Advanced Package.

All packages include USB device protection, AV capabilities, and a firewall. Panda Dome Advanced costs \$53.24 a year. This package includes protection against ransomware, viruses, app lock, call blocker, and parental controls. It covers PC, MAC, and Android devices.

These security suites may not be as cheap as Spectrum Voice calling plans but they are worth it when it comes to protection. Go ahead and buy whatever fits your security needs the best.

## **Final Words**

As we all know that in this era security issues raising day-by-day. Therefore, to secure your devices and assets you should use a security suite. Because hackers are always trying to steal your information for the sake of their benefits.
